

Matanuska-Susitna Salmon Habitat Conservation Partnership (Alaska)

More than 29 partners from State, Federal, Tribal, local, and nongovernmental organizations formed the Matanuska-Susitna Salmon Conservation Partnership to address the impacts of human use and development in the Matanuska-Susitna basin on salmon habitat. The group has collaborated to successfully implement multiple habitat restoration projects, including the Moose Creek fish passage and restoration project restoring 3,450 feet of river channel and providing more than five miles of improved access for Pacific salmon.
